RELEVANT SKILLS (CRITICAL)

- Web Content Accessibility Guidelines (WCAG)
- Applied project management techniques: project scope outlines, MVP's, and group stand-ups
- Analytical skills from running microbiological tests.
- Life-long learner
- Self-aware with strong leadership skills gained through playing team sports.

ABOUT ME

I'm not your average web developer. I'm an ex-scientist, now focused on working with my hands in a new way. My goals are to build amazing websites and learn something new everyday.

In web development, I get the opportunity to learn and apply new skills constantly. The frameworks are constantly changing and the frontier of this field is a place where new and unexpected things happen.

CAREER HISTORY

QA MANAGER

Medical Saints, 2018-2019

- Tracked movement of 1000 cannabis plants digitally from seed to packaging using Excel.
- Responsible for developing a validated system of standard operating procedures (SOPs) for the production process.
- Analyzed data obtained from the production process and revised SOPs to improve the process. The largest improvement was adding temperature and humidity optimization to each room in the facility, which helped increase crop yield by over 200% when implemented.

MICROBIOLOGIST (SENIOR)

Apotex Inc., 2013-2018

- Managed quality control testing and review of certificate of analysis (CofA) data for over 400 drug products and raw materials.
- Experience with Laboratory Information Management Software (LIMS) and digital result entry.
- Experience with customer and regulatory audits. Including FDA, CFIA, and Health Canada.

ACADEMIC HISTORY

JUNO COLLEGE OF TECHNOLOGY

Web Development Immersive Certificate, 2019

- Proficient with HTML, CSS, SASS, Javascript, jQuery, React, and Firebase.
- Comfortable using Git for version control and doing group project using Git collaboration.
- Prepared and delivered weekly presentations on project work using Google Slides.

UNIVERSITY OF GUELPH

BSc. Honours in Microbiology 2003-2008

- Selected to the Dean's Honour list in 2008.
- Completed an independent research project on pathogenic *E. coli*.
